

CAMCLEANER CITY

FILTRATION OF KITCHEN SMELLS WITH CAMCLEANER CITY

Location: EADS offices in Suresnes (near Paris, France). Operator: Vinci Facilities.

Initial situation: Employees are complaining about dirty water smells from the siphons of the showers and sinks, in the corridor.

Solution: A first CamCleaner City has been installed on the landing to clean the air of the room.

This new generation of air cleaner has a triple filtration stage: HEPA filtration + double molecular filtration stage.

CamCleaner City also has many advantages:

- It stops every indoor air pollutants: VOCs and particles.

- Unlike other air cleaners which use other technologies, it doesn't generate any secondary compounds, harmful to human health.
- Thanks to its simple and modern design, it can be installed everywhere, indoor.

Proof: There are no smells anymore in the corridor.

The client is satisfied and plans to install other CamCleaner City in other facilities.

Testimony by Mr. Etournaud, Vinci Facilities maintenance manager:

"Thanks to this solution, there is no need to re-prime the siphons every week anymore. This operation used to take 15 minutes."

CamCleaner City also removed efficiently glue smells due to renovation works on the ground floor. Before the CamCleaner City installation, we were smelling the glue from the fourth floor and it bothered the employees."
